

## **ABSTRACT**

*Pari Island is an island located in the Thousand Islands located in the province of DKI Jakarta. Pari Island is the second famous island after Tidung Island is quite popular with visitors sandy beaches. In Pari Island there are four beaches namely virgin beach, sand beach kresek, star beach, and beaches. Pari Island is an arising coral island. The existence of the natural potential of Pari Island needs to be developed in order to improve the tourism of Pari Island. The development of the facilities of Pari Island has a fairly hot temperature. Pari Island Pari Island is a tourist attraction that has a great atmosphere. Cabana is a small building that has a roof that is often used to shelter and relax on the beach and in the pool. With that the planner will support the design of the product and a product of a good value and aesthetics.*

**Keywords:** *Pari Island, Visual Aspect, Cabana*
