

ABSTRACT

Harday Kids is one of the companies engaged in the field of dressing children. The problem with Haydar Kids is the absence of the company's operational financial records in the form of journals and ledgers to record the operational transactions taking place in this company. In addition Haydar Kids company also does not have accounting reports in the form of income statement and balance sheet report.

Because accounting records that produce accounting reports are very important as a basis for determining sales decisions. Haydar Kids Company does not have an application capable of recording financial transactions of the company's operations resulting in the company's operational financial statements. In this final project, an application for recording of operational financial statements of the company in Haydar Kids.

Making this final project using software development method of waterfall model and implemented with PHP CI programming language and MySQL database.

Keywords: Company Operations Transaction, Accounting Report
