

ABSTRACT

Application of Operating Grant Program Management in Madrasah Tsanawiyah Pondok Pesantren Persatuan Islam Ciganitri Bandung is an application that used to managed the implementation process of fund management School Operational Assistance (BOS). Each year, Madrasah Tsanawiyah PERSIS Ciganitri get School Operational Fund (BOS) to support teaching and learning activities and school development. The process of managed a fund is must be detail and clear. But sometimes there are some problems when managed the fund and in the process of preparing the final report. This application can handle the process of making the Rencana Kegiatan dan Anggaran Madrasah (RKAM), management of incoming and outgoing funds until making final report or the Buku Kas Umum (BKU). This application is built in website version by using Waterfall method, using MySQL database and CodeIgniter Framework (CI). By construction this application, it can help the treasurer in managed the BOS fund and making reports related to BOS funds and can help heads of madrasah and heads of foundations to know and controll the implementation of BOS funds management and report creation.
