

ABSTRACT

Bot tools are software that can walk alone after you set the timer that has been specified. Bot Tools for auto delete friend is an application that can automatically delete the friend on instagram. Currently, it's easy for instagram users to create fake accounts on instagram that are free for users to use. This app is made to simplify the deletion of instagram user accounts that have follower or following inactive for a certain period of time . In the development of Applications Bot Tools for Auto Delete Friend With Certain Criteria in this Final Project use Prototype that is: listen User, build fix prototype, user test try prototype. Making this application also uses the basic programming language while for the design of the program using usecase and activity diagrams.

With the application of Bot Tools to Auto Delete Friend With Certain Criteria This can help users account instagram for no more follower / following that is considered disturbing the user.
