

ABSTRACT

Tourist attraction, location or everything that can be visited for the tourist agenda, where people or groups get entertainment in the form of a journey that is fun and satisfying so that it can comfort the heart. With the development of the era, tourism has changed from just an activity to drive boredom into a lifestyle. Nowadays a lot of tourist attractions that have an interesting rides along with the development of Internet technology is more advanced. One of them is a tree tower.

The tower of the trees is now the attraction of natural tourists. Along with bertembannya internet and social media tower trees today become an attractive photo spot. The current tree tower is not only for viewing from above, but also a place for interesting pictures. Therefore the tree tower must have good comfort and equality. In addition to support the comfort at the time of climbing, the tree tower must also ensure safety at the time of ride. So that no unwanted things happen. Therefore, in the design of this tree, the aspect of ergonomics is very important, because it discusses about the convenience and security of users.

Keywords: *Tourist attractions, tree towers, ergonomic aspects.*
