

ABSTRACT

Bandung is one of the city in Indonesia that has many tourist destinations. It is surrounded by mountains, meaning that the weather seems colder than cities in Indonesia. The temperature in Bandung that are feels colder makes it popular to most of people who want to enjoy nature. Nature tourism that can be found in Bandung include gardening, camping, and farming. Lately Glamping tour began gaining lot of interest from many people. There are some Glamping In Bandung, among other is Tour Glamping in Dusun Bambu, Cisarua West Bandung. Glamping (Glamor Camping) itself is a camping tour that presents lodging with luxurious style equivalent to star hotels but still gives a natural impression. Activities that can be done for participants Glamping are tracking, cycling, boarding the boat to bbq. In Indonesian barbeque activity can be called Barbeku. This Barbeka activity requires a variety of equipment such as grills, fans, and baked goods. The designer observes and tries to find problems in the activities of Barbeku in Glamping Area of Dusun Bambu by using design theory to solve the problem. With the use of functional aspects, the designer builds a product that has aesthetic value and value of the proper use and can be accounted for in the future.

Key Words: *Bandung, Glamping,, Food Cart, functional aspect*
