

REDESAIN SEKOLAH TINGGI MUSIK BANDUNG

REDESIGN BANDUNG SCHOOL OF MUSICIANS

ABSTRACT

Bandung School Of Musicians has produced high-quality and superior graduates, benefiting the community and the music industry in the country even the world of work in other fields such as the banking world etc. But over time, coupled with the right promotional strategies, the public interest in STiMB has increased the number of students who enroll from year to year counts three times the number compared to the first two years. Considering the number of students who enroll in college each year is increasing, causing the number of classrooms that are already inadequate, the lack of supporting facilities at this Music College, for that, in this design is made the addition of space requirements at the Bandung Music College. The addition of space requirements accommodates educational facilities, namely the addition of classrooms for inflatable equipment and stringed instruments, accommodating performance facilities namely the auditorium and supporting facilities namely the audio library and student lounge. Redesign of the Bandung Music College, designed for the addition of new space needs such as the addition of music practice classrooms, mini auditoriums and student lounges. He made additional space requirements to meet educational needs, but was also able to provide positive values for the surrounding environment.
