

ABSTRACT

Department of Health Bandung Regency is the agency authorized to keep people's health on Bandung Regency. In their job, Department of Health Bandung Regency need to spread any information to people of Bandung Regency. But, if all that is still done manually, it wil be considered less efficient time in the process. Because that, there came the idea to make an application that can manage information based on web. On the process, this application using PHP programming language with help of Codeigniter framework. Text editor that used for create the code is Sublime Text 3.
