

ABSTRACT

Putri, Yudith Manggalih. 2018. *Production Designer Design For Musical Drama Short Film Love Lust About Life After Marriage Among Students In Bandung.*

Within early age to build a family. Nowadays, about 50.2% of marriage has occurred in west java, and some of them are early marriage even they are students. Couples who marry at a young age will affect psychologically, one of them from the male and female sex organs and unstable emotional problems. Understanding and information about this is still lacking among students. Through short films in the style of musical drama, students and family comprehension can increase especially in the case of psychological partner. Young couples who marry during their studies will experience emotional changes that affect their marriage life in determining the home, setting, property and wardrobe because young couples who are newly married will have many desires to meet the needs of marriage.
