

ABSTRACT

Bagus, Fajar.2018. Editing Short Films With Montage Techniques About Lifestyle Clubbers High School Students In Bandung City, Final Project. Visual Communication Design Study Program of the Faculty of Creative Industry, Telkom University. Bandung.

We are currently faced with the globalization that is backed by science and technology with information and information from various corners of the world. which was subsequently adopted by the community through the intermediary of mass media. Global lifestyle, including ways to spend time and money from abroad has touched communities Indonesia especially the community living in the big city. His most striking at this time i.e. in environments of young children/teenagers, especially in the nightlife. The State is also supported by the advent of nightlife (discotheques) and cafes in urban areas. This is of concern to know further night life the young, especially those living in urban areas. With the presence of factors of social relations or intercourse, then predispose them to adopt the style guidelines for visiting nightclubs. Social change and the influence of enviroment that can motivate the young people to enjoy the world of entertainment this evening. Increasing the presence of the entertainment venues of the world tonight (discotheque) in Bandung city, making many people highlighted the social impact brought about by his Ministry or entertainment that is presented.
