

ABSTRACT

Construction of Lake Jatigede is a strategy and effort of Government to overcome drought in dry season and flood in rainy season, especially in area around Pantura, East Java. Behind the government's effort in the construction of the Jatigede Reservoir project, there are several impacts, one of them is changing of agricultural land function that impact on the livelihood of the majority population as farmers lost. But Jatigede Reservoir also has the potential to become an open world class tourist attractions. By bringing closeness and togetherness between individuals within a family, the designer makes a floating place to eat. Where floating place to eat positioned as a family meeting point, which is a place to eat where we have to sit on the floor with cross legged like sundanese with a view of the reservoir that targets small and large families as the primary object of sales.

Key Words: Lake Jatigede Sumedang, Floating Restaurant, Family Meeting Point
