

ABSTRACT

Jatigede Reservoir is the second largest reservoir in Southeast Asia located in Sumedang, West Java. Jatigede Reservoir has the potential to become an open world class tourism, therefore the government plans to build a tourism project located in Kampung Jatigede Kulon Village Cijeungjing Jatigede Subdistrict Sumedang District. Behind the government's efforts on the development of the Jatigede Reservoir project, there are several impacts, one of which is the changing function of agricultural land that impacts on the work of the majority of farmers are lost. However, that project has positive impact, one of which emergence of desire of the people to innovate to replace their lost job, but the culinary business established by the people haven't had the best facilities yet, therefore the author is interested to design a dining facility based on aspects of function in order to fulfill the consumers need.

Keywords: Jatigede Sumedang Reservoir, Dining Facility, Functional Aspect
