

ABSTRACT

College Library (PPT) is a Technical Implementation Unit (UPT) of Higher Education which together with other units also carry out the “Tri Dharma Perguruan Tinggi” by choosing, gathering, managing, caring for, and serving information sources or "Center of Learning". The quality of the library will be created if it is supported by the comfort felt by its users, for that facilities and facilities are needed that can support the convenience of visitors or visitors. At present, the Widyatama University Library has begun to provide innovations, and good facilities. However, not all facilities can meet the need to develop interest in conventional and digital-based reading interests for its users. Besides that, the condition of the library has only educational facilities. The Directorate General of Higher Education (2004: 3), that libraries should be a means and means of library as a center for education, information, recreation, and publication so that it will be able to increase the reading interest of the academic community and the general public. Therefore, it is necessary to redesign the Widyatama University Library of Librarianship in Bandung, so that it is representative of the needs of the growing age, the interest of the academic community and the general public.

Key words : Library, Facilities, comfortable, interest to reading
