

ABSTRAC

Education, science, and information become one of the most important needs for people's life in the modern era at this time. The rapid development of technology today requires individuals to continue to have sufficient knowledge and information. At this time Depok City is trying to realize the city of Depok as a smart city. Smart city is a vision to build information and communication technology (ICT) and Internet of things (IoT) technology in a safe way to manage city assets. One of the supporting factors in realizing this program is the supporting facilities of Depok City as a smart city, the library. The library is present as a bridge of people to seek knowledge and information. However, Depok city library does not have supporting facilities and has not met the vision and mission objectives, so it is necessary to design this library. In accordance with the vision and concepts that will be discussed is recreational and educative, the library that not only provide information but also as a recreation for visitors.

Keyword: *Library, Education, Depok Public Library, and Recreational Reading.*
