

ABSTRACT

Daily human activity conducted various activities to influence the condition of the patient. Some of the daily activities cause some errors. Some people complain of physical ailments due to habits and daily treatment, such as muscle, nerves diseases even bones. Some of these diseases affect the special services such as medical rehabilitation, especially in hospitals. One of these hospitals have facilities the Medika Halmahera orthopedic who has many patients who complained of a variety of ailments. Society should be facilitated with good given that medical rehabilitation as a whole are limited.

This can be done by having a clinic or hospital that facilitates the needs of medical rehabilitation with precise and complete in accordance with the needs of the community. By having a more complete medical rehabilitation expected patients or the public can terwujudkan up to the healing process runs smoothly.
