

ABSTRACT

Contractor company are company that doing contract with government or other company to supply certain goods or services that include building construction, highway construction, electrical installations, mechanical engineering and many more. At the Asian level, Indonesia's construction services market came in fourth after China, Japan and India. Each company has a business strategy for example create a corporate office that can accommodate all organizing activities, managerial, data storage, marketing and other office functions in accordance with the standards in order to support employee activities and productivity in improving company performance . In addition, the atmosphere in the workspace greatly affect the work activities such as layout arrangement, circulation, color, and interior elements such as walls, floors, ceilings and furniture.

PT.Nusatama Group is a contractor and engineering consultant company ranging from specialist manufacture and manufacturer of iron, geotechnical engineering, manufacturing bolts and nuts and mining and infrastructure. PT.Nusatama Group consists of PT.Nusatama Berkah, PT.Unggah Industri Ejawantah and CV. Perkasa Muda Perkasa which was established in 1991.

The increasing production and number of clients, PT. Nusatama Group requires offices with comfortable workspace to increase employee work productivity. The atmosphere inside greatly affects work activities such as layout layout, circulation, space in space, color, and processing of interior elements such as walls, floors, ceilings and furniture.

To support this, PT. Nusatama Group requires a new office that can load all employees in accordance with the company's organizational structure and space layout with a design that shows the company's identity to support all office activities so as to increase employee productivity and reach more consumers.
