

ABSTRACT

Indonesia has many kind of social problems. One of the problems is blindness disability. Although the society generally already realized about blindness disabilities, but there's still peoples that didn't know yet about their way to pass daily activities to mingle with society. It will be presented through 2D short animation media as education media for our society about blindness disabilities. By doing some process such us literature study, interview and observation. The message in this work can be accepted by society specially in Bandung City. The People with blind disability are not different than other humans. They could also live independently after going through various types of mobility exercise and facilities. In addition, visual background in this animatioan can be expected to represents the atmosphere of Bandung City nowadays.
