

## ABSTRACT

---

*CV Harum Prima Bandung is one of the companies engaged in the field of transportation. CV PO Harum Prima Bandung conduct ticket sales involves po / counter at the head office and at the agent located at Jl. Soekarno Hatta No. 480. The sale is done directly ie every prospective passenger come directly to the ticket sales. CV PO Harum Prima Bandung also experienced overwhelmed in the documentation report and ticket sales, it certainly has not supported the existing business process activities with the maximum. Based on the above problems built web-based applications that can be an alternative for passengers to make ticket reservations and help the CV PO Harum Prima Bandung in making a report this application is created using PHP and MySQL programming language as its database. Development method using SDLC (System Development Life Cycle) with waterfall model. We are hoping this application will help increase creadibility of CV PO Harum Prima on helping customer.*
