

ABSTRACT

Someone who masters and speaks more than two foreign languages have their own plus value in the workplace and also in social life, and Polyglot Indonesia Bandung Chapter is a community where the members are able to speak at least two foreign languages. Despite being called as a community, Polyglot Indonesia Bandung Chapter has an organized and right organizational structure that made the author attempts to analyze the research entitled "Polyglot Indonesia Organizational Communication Pattern (Case Study of the Polyglot Indonesia chapter Bandung Community)". The Author uses descriptive study method with a qualitative approach through interviewed the respondents, observations, documentation and literature studies as data collection techniques. And based on the results of the research that the authors did, the organizational communication which formed in this community is the pattern of all directions, even though it is the professional organization, but this community still be based on principle as a family. And during the communication process, all members and the committee have sense of fairness. This community is almost able to face what we said stucknation of communicaton, based on the results of this study, it can be concluded that the use of language is not the biggest problem to make a good communication because all members are able to speak a foreign languages, but sometimes, the place to have a meeting would be the problem of communication itself that happened in this community because until today, they still moving on from one to the different places.
