

ABSTRACT

Rumah Sakit Umum Daerah Soreang is one of the Government Hospitals located in the Regency of Bandung. Rumah Sakit Umum Daerah Soreang has outpatient services, inpatient, emergency care and support services. Inpatient services at Rumah Sakit Umum Daerah Soreang in 2016 have 211 rooms. The problem in Rumah Sakit Umum Daerah Soreang is not knowing the availability of rooms and there is no status inpatient rooms. The application of inpatient service management system is the result of research that can facilitate the management of inpatient rooms. The method used in the development of this application is the System development life cycle (SDLC) method with waterfall type and implemented in the PHP CI programming language and My SQL database. Testing is using black box testing.
