

Abstract

The West Java region is endowed with a variety of tourism potential which includes more than 350 more tourism objects and makes this tourism business become one of the core businesses of West Java. One of them is the White Crater Tourism Object. having his address at Jalan Raya Soreang km 25. As the name implies, the land in this area is white due to the mixing of sulfur elements. Besides the white land, the lake water in the White Crater area also has a greenish-white color and can change color according to the sulfur content contained, temperature, and weather. Location of Ciwidey White Crater is also often a place for other activities such as, Taking Pictures for films, Painting and Prewedding Photos. However, the image of the white crater began to decline due to the means of transportation provided by white crater tourism objects that are still less safe and less feasible for tourists, this is a major problem for this tourist location. Therefore, a solution is needed in the form of an appropriate shuttle vehicle that takes into account the comfort and safety of visitors and can enhance the white crater for tourist.
