

## **ABSTRACT**

The sports center is a facility that ensures the running of sports activities. Taekwondo is one of the official martial arts contested at the international level, this sport is very popular among Indonesian people. This sports branch comes from South Korea. Taekwondo martial arts began to develop in Indonesia around the 1970s. The city of Jakarta is the largest metropolitan city in Indonesia. According to the population. A special area or place that is good is needed to accommodate sports activities. Self-defense taekwondo that has educative and recreational characters is needed as a form of primary concern for Taekwondo sports. As a government-recognized sports branch, in this case under the hands of the WTF (World Taekwondo Federal) which regulates all activities of the Taekwondo branch, it also does not have a facility that can be used for national and international events in its matches. The existing facilities only borrow from other sports where they do not have sufficient facilities as martial arts that are popular enough to be able to come to know, learn, and see our athletes compete. In the direction of providing appropriate facilities, a building concept of martial arts is designed with the theme 'Art And Power or art and power. Conclusion in this design creates facilities that support athletes in terms of achievement and academics.
