

ABSTRACT

Creating independent and modern Islamic education by not abandoning existing religious values and overcoming the limitations of Islamic boarding school-based schools, and also avoiding understandings that are contrary to Islamic values. Give understanding to the community, especially to parents, to include their children in schools based on modern Islamic boarding schools, so as to avoid things that they don't want. The research methods used are field survey studies, documentation, and interviews. One of them is by taking special characteristics and characteristics of the city of Bandung in the form of surrounding buildings as well as elements of Islamic education which will later be used for further design processes. Design strategy is a description of the object of planning and design, namely boarding school. The initial stage is a comparative study with the existing boarding school objects. This comparative study serves as a comparison as well as a brief overview. The next step is to explore and analyze the character of Islamic boarding schools both users and activities in them. Where, is the embryo of the Islamic boarding school which is planned when its users formally study and develop talent creatively. . This character will later be associated with every thing in the boarding school environment that is well planned.

Keywords: Modren Islamic Boarding School, Locality, Creative.
