

## **Abstract**

Student Worksheets are printed teaching materials in the form of books containing material, summaries, and instructions for giving assignments and learning that must be done by students, both theories and practices that refer to core competencies and basic competencies that students must fulfill and their use depends on teaching materials other. Worksheets Students generally have various themes. One of them is about everyday life. In the Student Worksheet book used, it has several activities which include matching words, drawing, counting, coloring, and learning English. In carrying out this Student Worksheet, students are still accompanied by a Kindergarten Teacher. This is because so that the teacher can monitor the development of student learning, because also the age of students varies from 4 to 6 years and still needs guidance from people who are more mature. This Student Worksheet has weaknesses, namely: its use is relatively short, paid, and cannot be reused.
