

Abstract

The Al-Abroor Mobile application is an application that is made based on mobile, this application will help to remind the congregation of the mosque that has been given the task of carrying out the call to prayer, and the imam prays to remember the assignment given. The target user of this application is ta'mir mosque which will serve as a muezzin, and prayer prayer in the mosque in question. Functionality, can add, and reduce users in the ta'mir mosque group, can see the prayer schedule, can make a schedule of tasks at each prayer time of the week. Especially for Friday prayers, it can be determined every month, notifications are sent through the application in the form of a call to prayer and information on the officer of the muezzin and the imam of the prayer. Can automatically determine task schedules. Al-Abroor Mobile can be directly installed on smartphones owned by users. Language settings used on smartphones will be directly integrated with Al-Abroor Mobile. Smartphones connected to the internet or have data packages can access Al-Abroor Mobile anytime and anywhere.
