Indonesia has a wealth of diverse traditions in world textile craft. One example is bamboo shoots. This motif has bamboo shoots meaning which is a strength that appears from the inside. Bamboo shoots has the triangle shape and surrounded by shoots and leaves characteristic. This motif is easy to find in Riau and Malay. Based on observation data, bamboo shoots processed using weaving technique as usual, and the other techniques are printing and knitting by machine techniques.

Therefore, structure textile including crochet techniques can be alternative and also can be applied to fashion products. The methods used in this research is the qualitative method with the method of data collection those are literature study, observation, interview, and exploration. Exploration of the technique of crochet that potentially applied in fashion products. The results of this exploration can be developed into fashion products with a target market as a reference of crochet for applications on fashion products wich are bags with Bamboo shoots as an inspired.

Keywords: Bamboo shoots, Crochet, Surface Textile, Fashion products.
