(Textile and Fashion Craft Study Program)

Knitting has become a form of activity that can then produce a craft in various forms, by knitting we can get satisfaction, knitting techniques can also be used for Fashion Products. Many attempts to modify this Fashion Product to become a fashion trend, one of which is a combination of Fashion Products with motifs used, the motif used is a motif originating from Malay, one of which is the motif of bamboo shoots, which are very potential to make motifs for products This fashion. Therefore, the knitting technique can be used as a fashion product which is combined with Pucuk Rebung motif and applied to Fashion Products.

The method used in this study is a qualitative method and the method of concluding data, observations, and interviews, for the development of bamboo shoot shoot motives for exploration. The products produced are in the form of casual fashion products that can be used in daily activities.

The results of this study are to prove the opportunity of Bamboo Shoots Motif to be made into Fashion Products using the technique of knitting machines.
