In this digital age exchanging information is easier, but it makes searching difficult because of the limited resources and media that can cover certain things. According to Search and Rescue (SAR) survey data for every year, there is always a figure of an accident due to a lack of preparation and information for climbing. Departing from this problem, Kudaki created a media that can be used by all those who are interested in climbing and want to find information in advance for preparation. Kudaki can help novice climbers or advanced climbers to exchange information to reduce accidents due to several important factors such as mistakes in assessing a trip, mistakes in processing information, lack experience. In this research, business process planning and payment gateway implementation will be carried out to assist the financial transaction mechanism. The results obtained from this study are (1) Kudaki has a business process design; (2) Kudaki can choose and implement a payment gateway with a success rate of 100%.
