

## **ABSTRACT**

*Most of Indonesian biggest archery center are only outdoor facility. Meanwhile, according to news media mentioned Bandung Regency archery center is a place for archers gathering, and to practice together so they may adapted with this archery center.*

*By this, I will design an indoor archery center with standard facility, supporting facility for archery activity, and complete it with disabled facility in order to be qualified as standard archery center, to attract society, create new spirit and new athletes to make proud of Bandung Regency to National.*

*The design method is by gather primary and secondary data, also gather literatures of Bandung Regency PERPANI and the Main PERPANI, and also with problem identification to design benefits.*

*Theme and Concept are supported by several literatures for archery activity with Field Challenge theme and Woods concept, and supported by analogy approach that influences motivation and of the archers.*

**Keywords:** *Indoor Archery Center, Standard Facility, Supporting Facility, Disabled Facility.*
