

ABSTRACT

The College Library (PPT) is a library located in the area of a college or an equivalent institution which serves as a way to reach Tri Dharma Perguruan Tinggi, whose users are the academic community. The College Library (PPT) is a supporting element of colleges in academic activities, research, and community service. The library of Bandung Islamic University is a learning and teaching resource center which functions as a center for information, scientific and Islamic documentation center for the entire academic community of Bandung Islamic Community and the general public, but the current state of the library which has not fulfilled the required minimum land area stated in the National Library Standard (SNP), which can only accommodate a small portion of the students and the limitation of the area provided results in a few supporting facilities being not available, and the low interest of students to visit the library as a center for learning. Nonexistent implementation of the identity of Bandung Islamic University was also a goal in the redesigning of the library, to ensure that the library will improve and be utilized by the students of Bandung Islamic University or the general public. The redesign was done by broadening the area of the library through the Faculty of Communication which is located in the same building as the library and to implement the identity of the Bandung Islamic University.
