

ABSTRACT

PT. Indonesia Power is a subsidiary of PLN (National Electricity Company) which is engaged in providing electricity services in Java-Bali through electricity generation. There are several generating units managed by the company such as PLTA, PLTU, PLTG, and PLTD. Especially for Banjarnegara, Central Java, PT. Indonesia Power manages hydropower generation called is Mrica Generation Unit. The office building that will be redesigned is the administration office building. The selection of the object is due to PT. Indonesia Power Mrica Generation Unit has an Eco Office program but not yet optimal. In the redesign of the office of the administration building of PT. Indonesia Power Mrica Generation Unit, aims to clarify the concept that will be applied to the office with the Eco Office approach.
