

## ***ABSTRACT***

*The development of Co-working space in Indonesia which reaches 1.7 million people will work on a Co-working space at the end of 2018 which has an impact on the city of Bandung itself, which is one of the cities that has the nickname of Indonesia's creative industry city, a good place for development Millennial generation resources to encourage digital growth in the country*

*The Digital Nomad, Young Entrepreneurs, and millennials come from a variety of individuals and communities who have diverse backgrounds, Co-living has a variety of facilities that can meet all standards of residential needs, work and even recreational needs for startups and Creativepreneurs to create a good ecosystem. Some parameters that can be used as a measure of the non-fulfillment of the Co-Living Space standard in Bandung are a less strategic place, the creation of a community that can boost the ecosystem of startups and Creativepreneurs, incomplete facilities that support residential, occupational and recreational needs*

*Based on the analysis of these problems, it is necessary to design a residence that focuses on the community or ecosystem that can answer the problems faced by Digital Nomad and millennials and encourage the development of Digital Nomad and millennials itself*

***Keyword: Co-Living Space, Collaboration, Interior Design***
