

ACKNOWLEDGMENTS

Bismillahirrahmanirrahim,

Alhamdulillah rabbil alamin. I am grateful to Allah SWT for the good health and the opportunity to complete this study. I would not have been possible to write this thesis without the help and support of my surrounding people. I would like to express my sincere gratitude to my supervisor, Prof. Dr. Adiwijaya and Dr. Arie Ardiyanti Suryani for their help, support, patience, and immense knowledge. They always give valuable advice and guidance during this research and writing this thesis. I would like to thank all of the academic community of Telkom University, especially for the Graduate School of Informatics Engineering who have provided all the necessary support at the master program. Also, I thank all my friends in classmates which shared their opinions, and for all the fun we had in the last two years. Above all, sincerest thanks and appreciation to my parents and my family who always encourage me, prayed for me and give their best support from the beginning until now. I also would like to thank all people who I could not mention their name one by one.
