

ABSTRACT

Office is a place that is used to work and is equipped with several supporting facilities in it. The Office of the Directorate of Natural Resources and Ecosystem Conservation (KSDAE) is part of the Ministry of Environment and Forestry located as an institution owned by the Indonesian government and is under and responsible to the President. Conservation is the use and management of natural resources including wildlife, water, air, minerals and all renewable or non-renewable natural resources. Conservation is also an effort made by humans to be able to preserve nature, conservation can also be called conservation or protection. The Office Building of the Directorate of Natural Resources and Ecosystem Conservation (KSDAE) is located in the center of Bogor, which was founded in 1912, serves as a center for forest management and nature conservation in Indonesia. As a government building or building, this building has problems encountered in buildings such as cultural heritage buildings, facilities, circulation and office identity as regional government offices or the Ministry of Environment and Forestry offices. The structure of the KSDAE building has a square structure with an empty area which is usually used as parking for vehicles while the back there is land that has now been built as an additional building. The KSDAE building is classified as a cultural heritage building that has certain rules. Revealing the nuances of nature so that the application of back to nature design to the forestry office is by taking organic forms and giving plants at an angle or in the office building area so that the identity of the company can be more visible, namely the ministry of environment and forestry.

Keywords: Office, Ministry of Environment and Forestry, Conservation of Natural Resources and Ecosystems.
