

ABSTRACT

The city of Bandung is a city that is a center of activity for its people, including also a center for basketball sports activities that have been developing for a long time and gave birth to several professional athletes. Most people know about basketball without knowing how in detail about this sport and its development. Therefore, from this writing the author wants to design a basketball academy in the city of Bandung as an educational, informative, and recreational facility in order to create athletes who excel nationally and internationally so that people can give an appreciation of basketball by starting to follow the academy that will run. The space in this basketball academy is, lobby area, gallery area, manager's office, press conference room, meeting room, staff room, storage room, souvenir or retail store, basketball court, fitness area, swimming pool, theory study room , space for clothes storage, changing rooms, bathrooms, toilets, kitchens and janitors. With the existence of facilities that are complete and in accordance with the standards in academic basketball can attract interest for the community by using interesting concepts that are suitable for the purpose of the basketball itself.
