

ABSTRACT

Lestari Jaya Putri Laksana Company is one of the manufacturing companies engaged in production. The production is done by processing soybean ingredients into tofu. In operational activities carried out by companies, such as recording manual sales transactions that are still recorded in notebooks and companies also do not make sales reports. So that it requires an application that can handle sales in cash and recording computerized transactions and financial reports. In this study, the author will make an application that can record cash sales transactions to make financial statements for the company. This application is made using the PHP programming language, CodeIgniter framework, and MySQL database server. This application is expected to facilitate the operational activities carried out in the company in order to be more efficient.
