

Abstract

Culture is one of the characteristics of each region such as Riau culture. However, most people often do not realize the importance of knowing and recognizing the culture of their area of origin which resulted in the culture beginning to disappear slowly from the local community. Therefore, in this final project a game was created which could reintroduce Riau culture to the community, especially the people of Riau.

The type of game is an adventure that will bring users to get to know Riau's culture. The adventure given is in the form of a user's journey in finding information about Riau's culture (in the form of clothing, houses, weapons, musical instruments and food). This game application is built in the form of a mobile application. This decision making is based on the level of use of the mobile game application.

Keywords: Culture, Riau Culture
