

LIST OF FIGURES

Figure 2.1: Minutiae-based Component in Fingerprint Feature Extraction	8
Figure 2.2: Example of (a) Ridge Thinning Fingerprint Image and (b) Minutiae Points	9
Figure 2.3: Illustration of Creating Fake Fingerprint	10
Figure 2.4: Comparison of (a) Genuine Fingerprint and (b) Fake Fingerprint	11
Figure 2.5: Example of Discrete Voice Signal	13
Figure 2.6: Example of (a) Voice Signal and (b) Voice Signal After Pre-Emphasis .	14
Figure 2.7: Example of Framming and Wndowing	15
Figure 2.8: Example of Spectrogram From Word “data”	16
Figure 2.9: Voiceprint From Word “data”	16
Figure 3.1: Illustration of Proposed System	19
Figure 3.2: Registration Phase	20
Figure 3.3: Word Dictionary Generation Process.....	21
Figure 3.4: Collecting of Words for Registration Process	21
Figure 3.5: Two-syllable Selection Process.....	24
Figure 3.6: Word Selection and Pronunciation Process	26
Figure 3.7: Digital Signal Conversion Process.....	28
Figure 3.8: Illustration of Sampling Process.....	28
Figure 3.9: Example of (a) Analog Signal and (b) Digital Signal	28
Figure 3.10: Syllable-Based Voice Segmentation Process.....	30
Figure 3.11: Amplitude normalization process	31
Figure 3.12: Active Signal Filtering Process	33
Figure 3.13: Envelope Signal Generation Process	33
Figure 3.14: Tranformation From (a) Voice Signal $S[n]$ and (b) Absolute Voice Signal $ Sna[n] $	34
Figure 3.15: Evelopes of Voice Signal.....	34
Figure 3.16: Finding Cutter Indexes Process	35
Figure 3.17: The Use of Initial and Terminate Index	37

Figure 3.18: Transfer Active Signal Process.....	37
Figure 3.19: Syllable Segmentation Process	38
Figure 3.20: Illustration of Syllable Segmentation	40
Figure 3.21: Fingerprint Scanning Process.....	42
Figure 3.22: Example of Fingerprint Image	42
Figure 3.23: Authentication Phase.....	43
Figure 3.24: Minutiae-based Feature Extraction.....	45
Figure 3.25: 3x3 Window Filtering Configuration.....	45
Figure 3.26: Illustration of 3x3 Window Scanning.....	45
Figure 3.27: Example of (a) Ridge Ending and (b) Bifurcation in 3x3 Windows Filtering.....	46
Figure 3.28: Example of (a) Thin Fingerprint Image and (b) Minutiae Points.....	47
Figure 3.29: Fingerprint Matching Process	47
Figure 3.30: Minutia Tuple Generation Process.....	48
Figure 3.31: The Reference Point and The Five Nearest Points.....	49
Figure 3.32: Illustration of Distance Calculation of Reference Point With The Others Points	50
Figure 3.33: Illustration of (a) Five Nearest Minutia Point and (b) The Direction .	51
Figure 3.34: Straight Line from M to M'	51
Figure 3.35: Illustration of point A' and B'	52
Figure 3.36: Voice Feature Extraction	53
Figure 3.37: Voiceprint Generation.....	55
Figure 3.38: Illustration of Framming and Windowing Process.....	56
Figure 3.39: Voice Matching Process	57
Figure 3.40: Time Normalization Process.....	58
Figure 3.41: Example of The Time Normalization Process.....	60
Figure 3.42: Decision Making Using Serial Authentication.....	61
Figure 3.43: Experiment Scenario Diagram.....	62
Figure 4.1: Authentication Result Of Fingerprint And Voice Using Unenrolled Persons And Existing Word Based On TN Conditions	91

Figure 4.2: Percentage of True Negative of Authentication Using Fingerprint and Voice of Unenrolled Person Using Word In Existing Database	92
Figure 4.3: Authentication Result of Fingerprint and Voice Using Unenrolled Persons and Not Existing Word Based on TN Conditions	93
Figure 4.4: Presentation of True Negative From Authentication Using Fingerprint and Voice of Unenrolled Person Using Word That Not Exist in Database	95
Figure 4.5: Comparison of Accuracy Value Between Fingerprint Only and Fingerprint and Voice Using Existing Word.....	96
Figure 4.6: Comparison of True Positive and True Negative of Between Fingerprint-Based and Proposed Authentication System Using Existing Word.....	97
Figure 4.7: Capability of Each Biometric On (a) True Positive Condition and (b) True Negative Condition.....	98
Figure 4.8: Capability Of User Authentication Using Fingerprint And Voice Of Enrolled Persons Using Words In Existing Database	99
Figure 4.9: Accuracy Of User Authentication Using Fingerprint And Voice Of Enrolled Person Using Word In Existing Database	100
Figure 4.10: Comparison Of Accuracy Value Between Fingerprint Only And Fingerprint And Voice Using Word That Not Exist In Database.....	101
Figure 4.11: Syllables of (a) “a”, (b) “sa” and (c) its combination	102
Figure 4.12: User Authentication Capability Using Fingerprint & Voice Of Enrolled Person Using Word Which Is Not Exist In Database.....	102
Figure 4.13: Accuracy Of User Authentication Using Fingerprint And Voice Of Enrolled Person Using Word Which Is Not Exist In Database	103
Figure 4.14: The Strength Of Authentication Using Genuine Biometric.....	104
Figure 4.15: The Strength Of Authentication Using Spoofing Biometric	105
Figure 4.16: Venn Diagram Of Authentication Using Fingerprint And Voice When The Spoofing Was Done Only On Fingerprint.....	106
Figure 4.17: Venn Diagram of Authentication Proposed System When The Both Biometrics Were Spoofed Using (a) Recording Method and (b) Morphing Method	107
Figure 4.18: Different Between Voiceprint From Genuine Voice And From Spoofing Attack.....	108

Figure 4.19: Similarity value between genuine voiceprint and spoofed voiceprint...	109
Figure 4.20: Percentage Of Occurrence Of Words On The News Media Website...	110
Figure 4.21: Number of Combination from Two Syllable	110
Figure 4.22: Type Of Syllable And The Number Of Combinations.....	111
