

ABSTRACT

South Jakarta is one of the big cities, that has a large number of children with special needs, which is around 2.290 based on Badan Pusat Statistik (BPS). The aducation container for children with special needs is still very lacking. Even though basically special schools according to their categories must be able to help provide knowledge and skills for children with special needs because if only guidance from parents is not enough. Especially in the aspect of education, children with special needs also need knowledge because it is the right of every citizen fo feel a decent education.In the process of designing the Extraordinary Middle School includes the stage of literature studies relating to the standards and needs of Wimar Asih SLB. With the theme chosen is playfull with perpception of scape approach. Through the theme it is expected to help mentally retarded children to receive better learning and sharpen the creativity of students.
