

ABSTRACT

This study is done to find out the journalistic activities of disabilities journalists in the search, collection, processing and dissemination of online media newsdifabel.com. Newsifabel.com is an online media that includes analysis & opinions, disability works, stories, sports, law, education, reportage, arts & culture and figures that are processed and carried out by disabilities journalists. Although they had limitedness, they have the passion and strong determination to build this online media. This is because of the discrimination felt by them, especially in terms of reporting. This study uses the method a qualitative approach to produce descriptive data in the form of speech, writing and behavior of observed people so can recognize the subject and feel their experiences in social life. Then the results obtained about complete figure of the journalistic activities carried out by disabilities journalists. The results showed that the search, collection, processing and dissemination of information on online media newsdifabel.com conducted by disabilities journalists had different ways and processes from journalists in general. But without changing or replace the concept of journalistic activity.

Keywords: *Journalism, Online Media, Disability*
