

## ABSTRACT

*Nowadays, library is no longer considered as a place to find for a books. The library is obtain a variety of activities in order to support the public interest of reading. The development of public interest for reading and writing are related to literature which also a complementary of books. Unfortunately, in Indonesia, the amount of people that are enthusiast to literature are decreasing, because the people often assumes that Indonesian's literature is not delightful. One of the strategy to re-introduce the Indonesian's literature is by conserving Pusat Dokumentasi and The H. B. Jassin Literary Library located in Central Jakarta. Although, The H. B. Jassin Literary Library already has an administrator and information center, there is still a limitation of area issue, a lack of facility that support the collection's to everlasting, and the administrator's work are still not satisfying. The H. B. Jassin Literary Library is still utilize the Map systemic, thus the classification of new books collection in the open area is still unorganized and its relationship with the visitor in order to create layouting has not be adjusted. Therefore, the attempt to support this design is by pull off the psychological approach of the visitor of all ages to create a more pleasant atmosphere to the literature library and adjust it to the national and international standard (based on the vision and mission).*
