

ABSTRACT

The development of automobiles in Indonesia, especially cars, is of considerable interest by the Indonesian people. The number of visitors to the Indonesia Modification Expo (IMX) exhibition which was held in November 2018 totaled around 10 thousand people and exhibited 300 cars from all regions in Indonesia. The development of the after market industry and the expansion of the automotive community in Indonesia are among the causes. The car accessories industry and automotive community are supported by a place that supports the needs of the automotive industry to meet the needs needed in the automotive world established by business people or automotive services. Detailbox is one of the companies engaged in automotive service that offers services in cleaning vehicles. Designing Detailbox Autoservice by designing space in new buildings that are wider and autoservice facilities which include designing public spaces and facilities in the form of waiting rooms, meeting rooms, entertainment facilities, bars, retail parts, along with other public services by optimizing the organization of space that aims to create convenient and ideal public services.
