ABSTRACT

Official travel is a trip made by employees for a task or order. There are several problems when managing official travel documents such as those faced by the Tasikmalaya Regency government unit of the Office of Communication and Information, so there is a need for applications to manage official travel documents. So the purpose of this research is to build a web-based SPPD management application which can facilitate the Tasikmalaya Regency government especially the Communication and Information Services unit in managing official travel orders, managing official travel costs and recapitulating warrant through the website. In making this application using the Systems Development Life Cycle method with a welfelfall model, the Html programming language and php using the CodeIgniter framework and using a MySQL database. This application is expected to help the Tasikmalaya Regency government especially the Communication and Information Office unit in managing official travel orders.
