# ABSTRACT

*The Community service Activity report is a report to show the results of community service activities that have been conducted by lecturers. But currently both in lecturers and research parties and community service in conducting activities, search and storage reports still use manual ways such as the process of creating and storing reports of community service activities Who still use Microsoft Word applications so that it takes a long time in the process, as well as the search and storage processes of public service activities. So that lecturers and staff of community dedication need applications to simplify in the process of creating reports, searching and storing reports. The application is built in the Waterfall method, using the PHP programming language and Codeigniter framework with the use of MySQL databases. So this application is built to facilitate lecturers and staff of community dedication of Telkom University in conducting reports, search and storage of public service activities report.*
