ABSTRACT

Almalia School is an early childhood education institution located in Permata Buah Batu *of Bandung. Almalia School has several learning classes for playgroup A, playgroup B, kindergarten A and kindergarten B. To support the learning and teaching process at Almalia School, there is an inventory of items used such as reading books, educational games, outdoor games, tables, chairs, carpets , and others. The process of managing inventory data at Almalia School still uses notebooks to manage temporary problems such as inventory records of lost, damaged and torn items. So the purpose of this study is to discuss the application of Almalia School inventory data management. Where this application is used to manage inventory of goods. The process of making an application using the prototype method with the programming language used by PHP and HTML with the CodeIgniter Framework.*

Keywords: Management, goods, inventory, data, inventory of goods
