

ABSTRACT

In September 2019, news appeared in the mass media about the Hoax Ambulance, Pemrpov, DKI and PMI carrying rocks and gasoline during the demonstrations on September 26, 2019 on Kompas.com and Detik.com. The mass media preached the news, some of the mass media that preached the most news were Kompas.com and Detik.com.

The purpose of this study is to see how Kompas.com and Detik.com select the problem and discuss aspects of the coverage of the ambulance of the DKI Jakarta Provincial Government and PMI carrying stones and gasoline during the September 26, 2019 demo. In this study the study used a qualitative research method with an analysis model Robert N. Entman's framing and the constructivism paradigm. The results showed that Kompas.com has a subjective perspective in making news while Detik.com is inclined to see an objective point of view. This showed that it means Kompas.com uses a source or an important figure in every news delivered meanwhile Detik.com writes the news according to what is in the field. The value of the news contained in the news on Kompas.com and Detik.com that is that they feature important figures and causes conflicts between the police, DKI Jakarta Provincial Government and PMI
