

ABSTRACT

As an island nation that is crossed by the equator, Indonesia is one of the countries included in the path of the spread of Thalassemia. Thalassemia is the most genetic disease in the world. In Indonesia, by 2018 there will be 9,028 sufferers throughout Indonesia. Thalassemia Indonesia Foundation was formed by a father named Ruswandi on May 27, 1987. With all the limitations of cost and energy, the Thalassemia Indonesia Foundation stands as a forum for Thalassemia sufferers to share their sufferers and parents. The final work in the form of a documentary film aims to provide a visualization to the audience how Mr Ruswandi's struggle in establishing the Thalassemia Indonesia Foundation has a duration of about 13 minutes. This study uses a qualitative method with data collection techniques using research, interviews and literature study. The results of this Final Project are a biographical documentary from a Mr. Ruswandi. The documentary is expected to be able to provide an overview to the audience about the struggle of Mr. Ruswandi to form the Thalassemia Indonesia Foundation, and can open people's eyes to be able to know what Thalassemia is, and how to prevent it. The conclusion of this documentary gives an overview of the audience about the struggle of Mr. Ruswandi to build the Thalassemia Indonesia Foundation.
