*Islamic boarding school is an Islamic religious-based educational institution with a boarding system, which applies a national curriculum and a typical curriculum. Education on the basis of the Islamic religion is important for the advancement of the nation's generation which still adheres to moral and religious values. Over time, the facilities offered by Islamic boarding schools have become more complete and have a good quality, which is the reason parents have chosen boarding schools. Eco Pesantren Daarut Tauhiid is a boys school pesantren in West Bandung Regency that applies the national curriculum and Daarut Tauhiid's typical curriculum in the learning process. Based on the survey of existing buildings at the Daarut Tauhiid Islamic Boarding School and a comparative study survey at four educational institutions namely, Al-Wafa Boarding School, Al-Ma'soem Boarding School, Cahaya Rancamaya Islamic Boarding School, and SMK Telkom Bandung, the problems that existed at Eco Daarut Tauhiid Islamic Boarding School are the absence of elements and facilities that represent and support the realization of the vision or goals of the Daarut Tauhiid Islamic Boarding School relating to technology and environmental insights. The interior redesign of the Daarut Tauhiid Eco Pesantren aims to create facilities that support the realization of the goals and ideals of the institution, and give character to the space in accordance with the identity of the Daarut Tauhiid Eco Pesantren.*
