ABSTRACT

Boarding School is a school system with a dormitory, where students, teachers and managers live in a dormitory, which is in the school environment for a certain period of time. At school students interact with fellow students and teachers. Modern life such as now brings various kinds of negative implications that have resulted in many criminal acts committed by school children, thus making parents worry about the unfavorable environment for their children. A good boarding school maintains strict and minimizes the negative influence of the environment that is not in accordance with the education system, thus students avoid negative things. Based on the results of interviews with Al-Ma'soem, students are required to stay in a dormitory, to adjust to the boarding school environment. Activities are carried out together, even areas that are required to be shared areas, from the positive side students are trained to behave tolerance and loyalty among others from the negative side of the privacy of students will be reduced. The problems related to interior are not yet optimal conditions of supporting facilities in the teaching and learning process of students, such as the unavailability of special libraries for high schools, laboratory activities rooms, and student learning facilities in dormitories. Based on this fact boarding schools require a fairly large area, it is necessary to relocate the design of Al-Ma'some High School in the area in Rancaekek to meet the facilities of learning facilities that fit the needs of boarding schools. In the interior design, Al-Ma'soem uses interactive approach and refers to comparative studies and standards set by the Ministry of Education in 2007 and 2011. Got questions about interactive space applied to the design to answer questions. In its application, interactive space has the characteristics of the existence of action, relationships, mutually active between one space with another space. Interactive from the word interaction, ie things that mutually act, relationship, affect relationships. Reaction of cause and effect relationships. The concept of interactive space provides space for interaction between interior spaces of buildings. Laying between spaces are grouped based on space with the level of privacy of each activity

or function that is contained. Answered this concept can answer the pattern of human conversation in Islam.
