

## ABSTRACT

*The library of Widyatama University is one of the college libraries which is located in the campus area of Widyatama University of Bandung City. The library of Widyatama University is called Pustakaloka Library. The college library is the library that is located in the university environment. The important role of the college library is for giving the service of information at the university environment. As the support for the college of Tri Dharma. The building has  $\pm 926,22$  m<sup>2</sup> area with  $\pm 5.152$  students, while according to the national library standard with such numbers of student should have the building with 1.500 -  $\pm 2.000$  m<sup>2</sup> area for 5.001 upto 7.500 students. This will be basic research to redevelop the interior design which is needed for the expansion of the library to meet the needs of user by adding facilities due to college library standard, good circulation for activities in the library, so it does not only increase the area for providing comfort to user but still has aesthetic and functional value so that it gives more appeal to user. Another addition is a technology-based facility by looking at the development of the current learning era.*
